

Req ID	TYPE	DESCRIPTION	PRIORITY	ACCEPTANCE CRITERIA	RATIONALE
FR-001	Functional	The system shall allow verified trucking carriers to submit competitive bids on posted freight shipments within a specified auction timeframe	High	Pass: A verified carrier can submit a bid before the auction deadline, and the bid is recorded and the shipper is notified. Fail: An unverified carrier can submit a bid or a bid is accepted after the deadline	Core functionality for connecting freight loads with carriers through competitive bidding.
FR-002	Functional	The system shall allow shippers to post freight loads by providing shipment details such as origin, destination, cargo information, and required delivery details.	High	Pass: A shipper enters all required shipment details and the freight load appears as an available posting. Fail: The system publishes a load when required information is missing.	Shippers need to publish their transportation requirements so carriers can view and bid on them.
FR-003	Functional	The system shall allow shippers to view and evaluate submitted carrier bids for their posted freight shipments.	High	Pass: The shipper can view all valid bids associated with a posted shipment, including the carrier and bid amount. Fail: A valid submitted bid is missing from the shipper's bid list.	Enables shippers to compare available carrier offers and make an informed selection.
FR-004	Functional	The system shall allow the shipper to select a carrier from the submitted bids and confirm the selected freight assignment.	High	Pass: The shipper selects one valid bid and the system records the corresponding carrier as	Required to finalize the freight transaction after comparing carrier bids.

				assigned to the shipment. Fail: The system assigns a carrier without a shipper selection	
FR-005	Functional	The system shall verify electronic proof of delivery before releasing the corresponding milestone payment to the selected freight carrier.	High	Pass: Payment is released only after valid electronic proof of delivery is submitted and verified. Fail: Payment is released without successful proof-of-delivery verification.	Ensures that carrier payment is linked to successful and verified delivery.
NFR-001	Non Functional	Milestone payments held in escrow shall disburse automatically within 60 seconds of verified electronic proof-of-delivery submission	High	Pass: Benchmarking confirms that the payment is automatically disbursed within 60 seconds after verified proof of delivery. Fail: Payment takes 60 seconds or longer	Ensures timely automated payment processing after delivery verification.
NFR-002	Non Functiona;	The system shall protect freight, carrier, shipper, and payment-related information from unauthorized access.	High	Pass: Unauthorized users are denied access to protected shipment and payment information during security testing. Fail: An unauthorized user can access protected information.	Protects sensitive business and payment information and maintains trust between marketplace participants.
